Srikakulam, Andhra Pradesh, India- 532201

OBJECTIVE

A highly motivated computer science student with a solid foundation in **Data Analysis, Artificial Intelligence and Machine learning**, specializing in Python. Seeking the position where I can apply my technical skills, analytical thinking, and teamwork abilities to build efficient and innovative software solutions.

EDUCATION

Rajiv Gandhi University of Knowledge Technologies, Andhra Pradesh
PUC and Bachelor of Technology in Computer Science August 2025

PUC CGPA: 8.8+

BTECH CGPA: 8.3+

SSC CGPA: 10.0

PROJECTS

Credit Card Approval system

Built a credit card Approval system from scratch using NLP techniques and machine learning models. Implemented in Python with scikit-learn, achieving high accuracy.

Cluster Identification in our Campus

Built a machine learning model to recognize each cluster just by looking at an image from any side or angle using InceptionV3 model.

Personalized Anime Recommender

Developed a machine learning model to help anime lovers to suggest what to watch next based on their interests by using content based filtering.

SKILLS

Programming Languages: Python, C, Java, MySQL, SQL, HTML, Javascript, Tableau

Frameworks: Pandas , Numpy , Seaborn , Scikit-learn and Matplotlib

Tools and Technologies: Visual Studio Code, Jupyter notebook, Google colab, Git and Github

Soft Skills: Time management, Adaptability, Problem-Solving, Team work and collaboration
